

Last updated: 2026/09/03

For first-time HFM users

New cashback account

Those who already have an HFM account

Additional cashback account

Precautions

Effective June 4, 2026, only auto-rebate accounts will be available. Please note that regular cashback will no longer be available. Brokers that do not currently support auto-rebates are being prepared/inquired about supporting them sequentially. Currently, the FX companies that support auto-rebates are XMTrading, HFM, XS, LandPrime, MYFXmarkets, M4Markets, Exness, and Axi.

Rules and Precautions *

▷Received the day after the transaction.

The cashback will be credited to your trading account the day after the transaction.

▷Receive in Japanese Yen

The cashback will be automatically converted to Japanese yen at the HFM rate at the time of the transaction.

▷Cashback eligibility conditions

Please note that cashback will not be offered for the following types of transactions.

- **Transactions settled within 2 minutes**

▷Fluctuations in cashback amount

The cashback amount for HFM fluctuates depending on the exchange rate, so there may be slight differences from transaction to transaction.

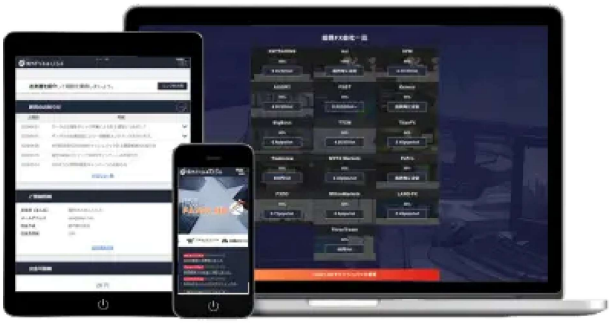

With the cashback amounts mentioned above as the minimum guaranteed amount, FANCLUB has implemented a system called the FP Program where the cashback increases the more you trade. The FP Program is designed to give more rewards to those who trade more, and it is possible to receive up to 94.8% of advertising rewards as cashback .

Open FP program details

Cashback redemption method compatible with two types of plans

Q&A Collection

Q. What are the disadvantages of cashback?

A. The disadvantages of the HFM cashback offer are as follows:

Two disadvantages

- No cashback is offered for transactions under 2 minutes.
- Cashback reduction based on the percentage of bonus used.

No cashback is offered for transactions under 2 minutes.

There are no disadvantages in terms of transaction conditions.

There are no disadvantages to cashback accounts in terms of trading conditions. Spreads, swaps, leverage, and fees are all the same as with regular accounts. Also, you can rest assured that FANCLUB will not experience issues such as widened spreads or delayed order execution.

Q. I already have an HFM account, though?

A. Please open an additional account.

If you already have an HFM account, please open a cashback account as an additional account. Opening an additional account takes about one minute. Please follow the instructions on the following page.

HFM Additional Cashback Account Application Page

Q. What account type do you recommend?

A. It depends on the situation.

At HFM, there is no difference in execution speed between account types, so when simply comparing trading costs, the Pro account is the most cost-effective, followed by the Zero account. However, deposit bonuses are not available with the Pro account or Zero account, so if you are looking for a deposit bonus, please use the Bonus account.

While the Pro account offers advantages in terms of transaction costs, the Zero account, with its narrower spreads, is simply easier to trade with. Therefore, some users utilize **the copy trading tool provided free of charge by FANCLUB** to copy trades from the Zero account (with its narrow spreads) to the Pro account (with its lower costs), creating a low-cost and user-friendly trading environment.

Q. The cashback amount is in dollars, though?

The exchange rates are as follows:

- **Standard rebate** [Yahoo Finance USD/JPY closing rate]
  on the day of the transaction
- **Auto-rebate**
  HFM USD/JPY exchange rate at the time of trading

Q. When will I receive the cashback?

A. The cashback redemption dates for HFM are as follows:

In the case of auto-rebate

- **Monday around 8:00 AM**
  Receive orders placed Friday-Sunday
- **Tuesday-Friday around 8:00 AM**
  Receive transactions from the previous day
- **Weekends and New Year's Day**
  No cashback applied

In the case of a regular rebate

- **Monday around 4 PM**
  Receive orders placed Friday-Sunday
- **Tuesday-Friday around 4 PM**
  Receive the previous day's transactions
- **Weekends and New Year's Day**
  No cashback applied

Generally, cashback earned from the previous day's transactions is credited on the next business day. However, please note that the crediting time may be delayed due to HFM system maintenance or other reasons.

Furthermore, the auto-rebate history on the FANCLUB member page is recorded at the same time as the regular rebate calculation.

FANCLUB processes withdrawals between 11:00 AM and 7:00 PM on weekdays. Withdrawal requests received during this time will generally be processed within two hours.

However, delays may occur if there are any problems on the financial institution's side. In such cases, we will announce the reason for the delay on the member page, so please check **the member page announcements.**

Q. Are there any withdrawal fees?

A. Cashback withdrawals are free of charge.

Normally, with rebates, withdrawals are made from FANCLUB, so FANCLUB covers all transfer fees incurred by financial institutions. However, with auto-rebates, withdrawals are made from HFM, so the fees will be subject to **HFM's withdrawal methods .**

However, when withdrawing funds from FANCLUB in cryptocurrency, the following transaction fees will apply.

cryptocurrency	Minimum withdrawal amount	commission *
USDT (TRC20)	10 USDT	1 USDT
USDT (ERC20)	10 USDT	0.43 USDT
BTC	0.0002 BTC	0.000015 BTC
ETH (ERC20)	0.006 ETH	0.00002 ETH
XRP	15XRP	0.02XRP

Q. What is auto-rebate?

A. This system allows you to receive cashback directly from HFM.

There is no difference in the cashback amount between auto-rebates and regular rebates. However, with auto-rebates, the cashback will be received in your HFM trading account, not in your FANCLUB account.

account.

The introduction of this auto-rebate system allows traders to centrally manage their funds within their brokerage firm, significantly reducing the hassle of transferring funds and filing tax returns.

Q. How do I apply for auto-rebate?

A. You can apply when you register your account with FANCLUB.

HFM's auto-rebate program can be applied for when you register your HFM account **on the FANCLUB member page .**

Computer screen | Smartphone screen

Q. What are the disadvantages of auto-rebate?

A. The following three points are frequently raised as concerns:

Cashback withdrawals will be processed through HFM.

However, with auto-rebates, there's the advantage of being able to easily use the cashback as trading funds, so it's a trade-off; the pros and cons depend on the user's circumstances.

Is the cashback amount different from the usual rebate?

While some IBs (Introducing Brokers) offer different cashback amounts for regular rebates and auto-rebates, FANCLUB offers the same amount. Furthermore, FANCLUB offers the highest cashback amount for HFM (Home Financial Management).

Will bonuses be automatically credited to my trading account?

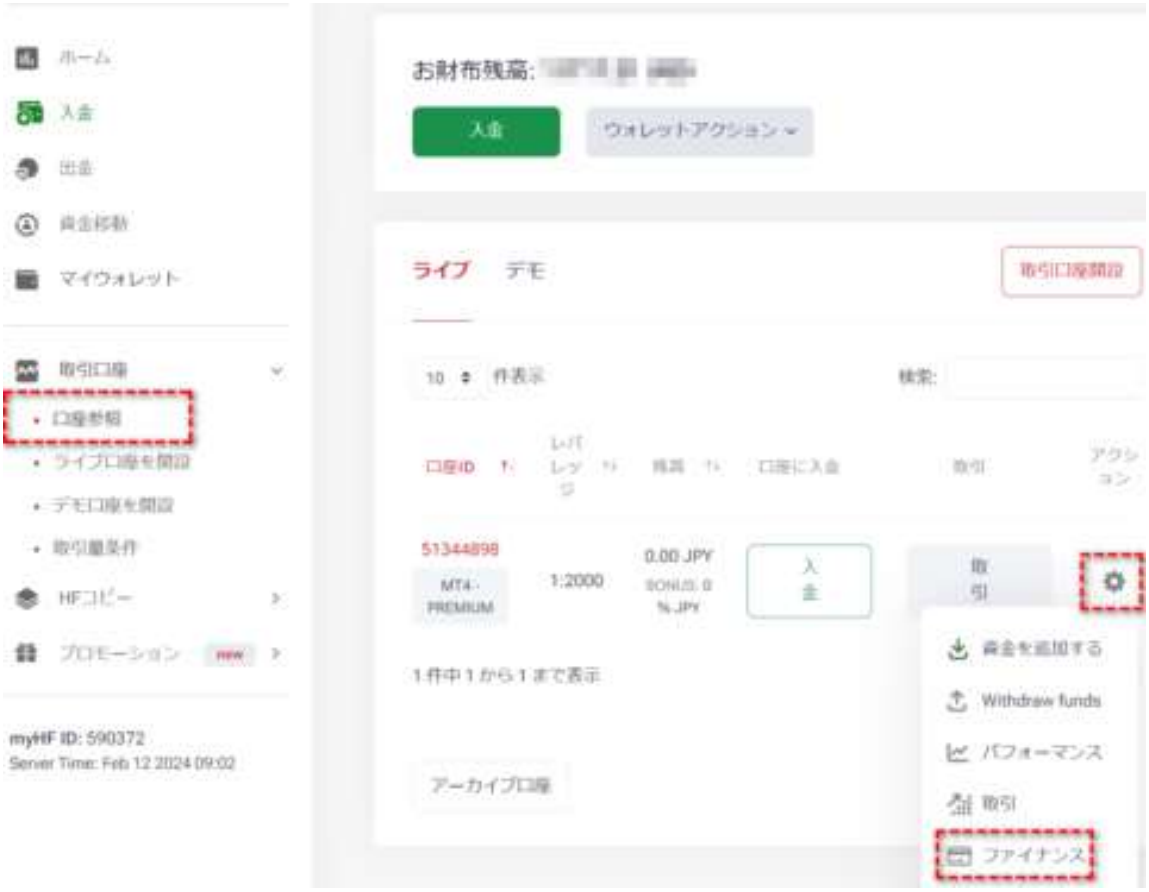

If an auto-rebate is paid to your Top Up Bonus account, which is eligible to receive deposit bonuses, please be assured that the auto-rebate will not be treated as a deposit, and therefore the deposit bonus will not be automatically credited.

Q. How can I check for auto-rebates?

A. Auto-rebates can be checked through myHF and the app.

To check from myHF

myHF > Traders Area > Trading Account > Account Reference > Select Finance from the gear icon under Actions on the far right of the displayed account > Rebates from 314605 displayed on the Deposit tab is for deposits via auto-rebate.

When checking from the HFM app

First, log in, then tap the menu (three horizontal lines) in the bottom left corner > tap My Wallet > Live Account > tap the arrow to the right of the displayed trading account > tap the three-dot icon in the lower right corner of the displayed trading account login information screen > tap Finance > Rebates from 314605 displayed on the Deposit tab is the deposit via auto-rebate.

Q. I'd like to use it in conjunction with my bonus, is that possible?

A. Please use the Top Up Bonus account.

With a Top Up Bonus account, you can receive both cashback and deposit bonuses. While Top Up Bonus accounts have slightly higher trading costs, if you can accept that, using a Top Up Bonus account allows you to combine bonuses and cashback.

HFM also offers numerous promotions in addition to deposit bonuses. Please check the following sections for information on the promotions available for each account type.

Q. What kind of traders is HFM suitable for?

A. This is not suitable for short-term traders who close their positions within 2 minutes.

HFM has a so-called "2-minute rule," which means that no cashback is given for trades settled within 2 minutes. Therefore, if traders who repeatedly settle trades in the short term use HFM, their profits will be eroded by HFM's wide spreads, making it difficult to win. For this reason, we do not recommend HFM for those who repeatedly settle trades within 2 minutes.

However, in terms of transaction costs, it is superior to low-cost brokers such as Exness, so it is definitely worth trying for short-term traders who do not close their positions within two minutes.

Furthermore, while HFM advertises itself as swap-free, currently only positive swaps are free. Therefore, for those who hold positions for the long term, such as in swing trading, we recommend accounts that are effectively swap-free, such as XM's KIWAMI account.

Q. Are there any account maintenance fees?

A. Leaving an account dormant for 90 days will incur a monthly account maintenance fee of $5.

With HFM, trading accounts are not deleted even if left inactive for a long period, but they will become dormant accounts if left inactive for 60 days.

If an account becomes dormant and is left inactive for 90 days, a monthly maintenance fee of $5 (USD) will be automatically deducted from the trading account until the account balance reaches zero. Furthermore, if the dormant period exceeds one year, the maintenance fee will increase by $10 each year.

However, if you transfer the balance of your account to your wallet account, you won't be charged account maintenance fees, so please transfer the balance of any accounts you don't plan to use for a while to your wallet account.

HFM(HotForex)会社概要

ライセンスとサポート

HFM本社はキプロスですが、日本居住者は小会社であるHF Markets（SV）Ltd.を利用可能で、このHF Markets（SV）はセントヴィンセント・グレナディーンにて国際事業会社として登録されています。

顧客資金の安全性については、規制に信託保全義務がないため、分別保管のみとなっていますが、HFMでは、四大会計事務所Deloitte Touche Tohmatsuから会計監査を受け、さらにRenaissance Insuranceによる500万ユーロのビジネス保険にも加入しているため、十分な透明性の確保とリスクヘッジがなされていると判断しています。
